Nobody else is paid to fill the room.

Ticketing sells to the people already coming. Promoters take the risk — but filling the room falls to the artist.

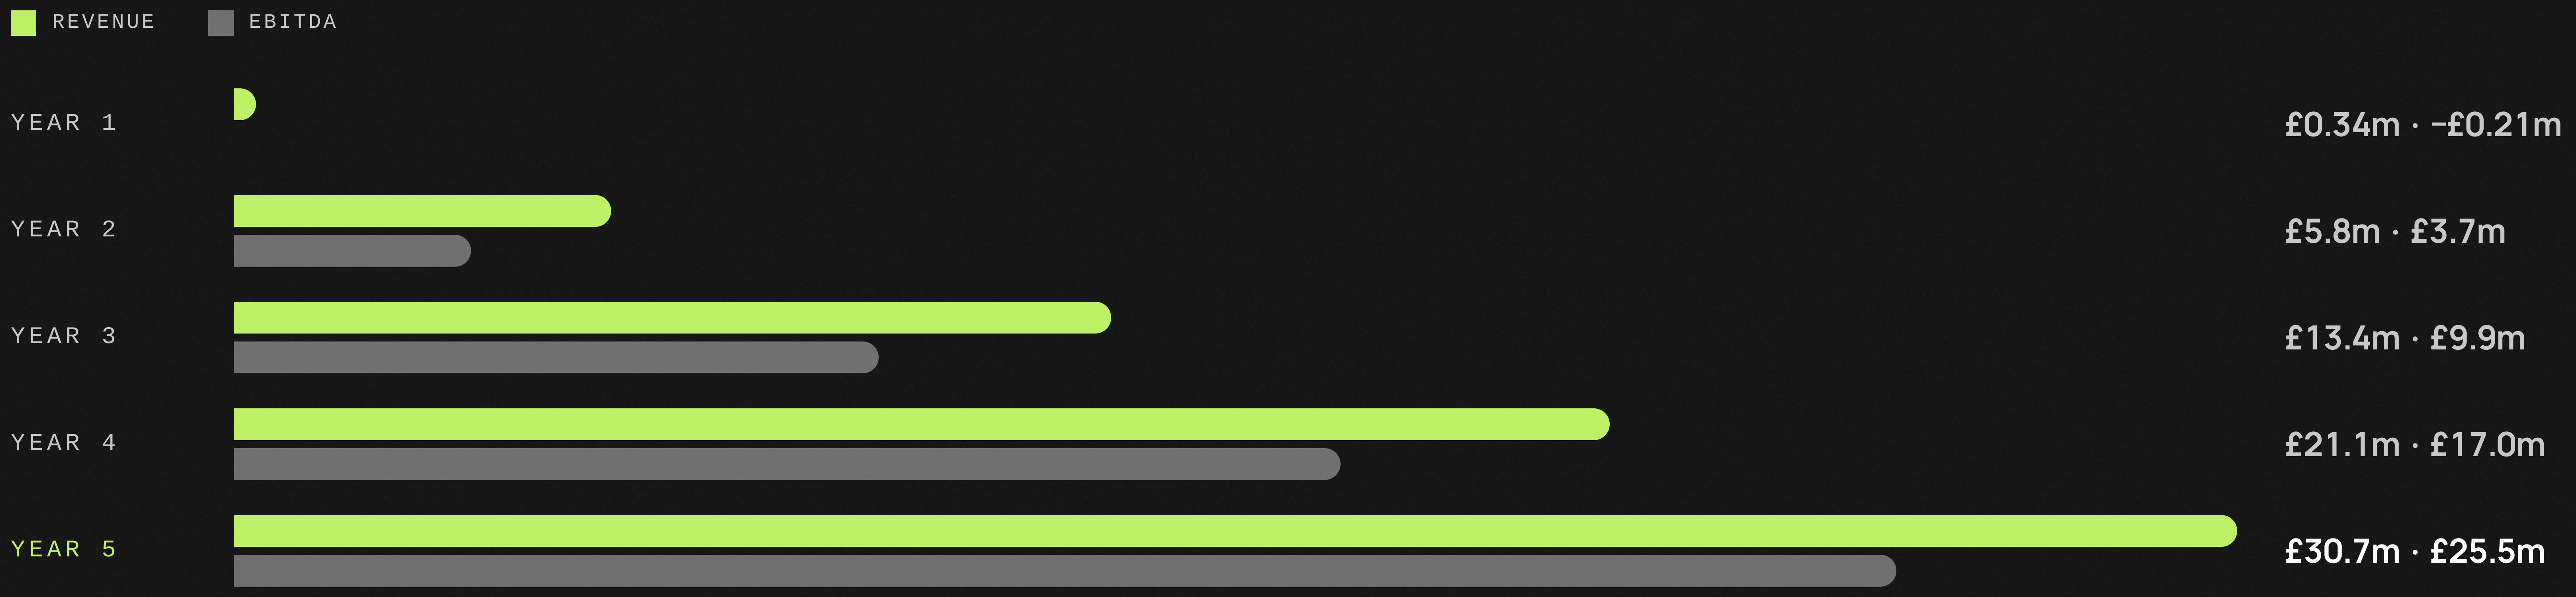
BASE CASE · BUSINESS PLAN V6

£30.7m and 83% margins by Year 5.

We take 20% of gross box office — 13% from the fan, 7% from the artist. It is the same twenty pence on every ticket the engine sells.



EBITDA-positive in April 2027. The margin climbs because the roadmap does — 68% today, 83% once the artist's team runs it.
