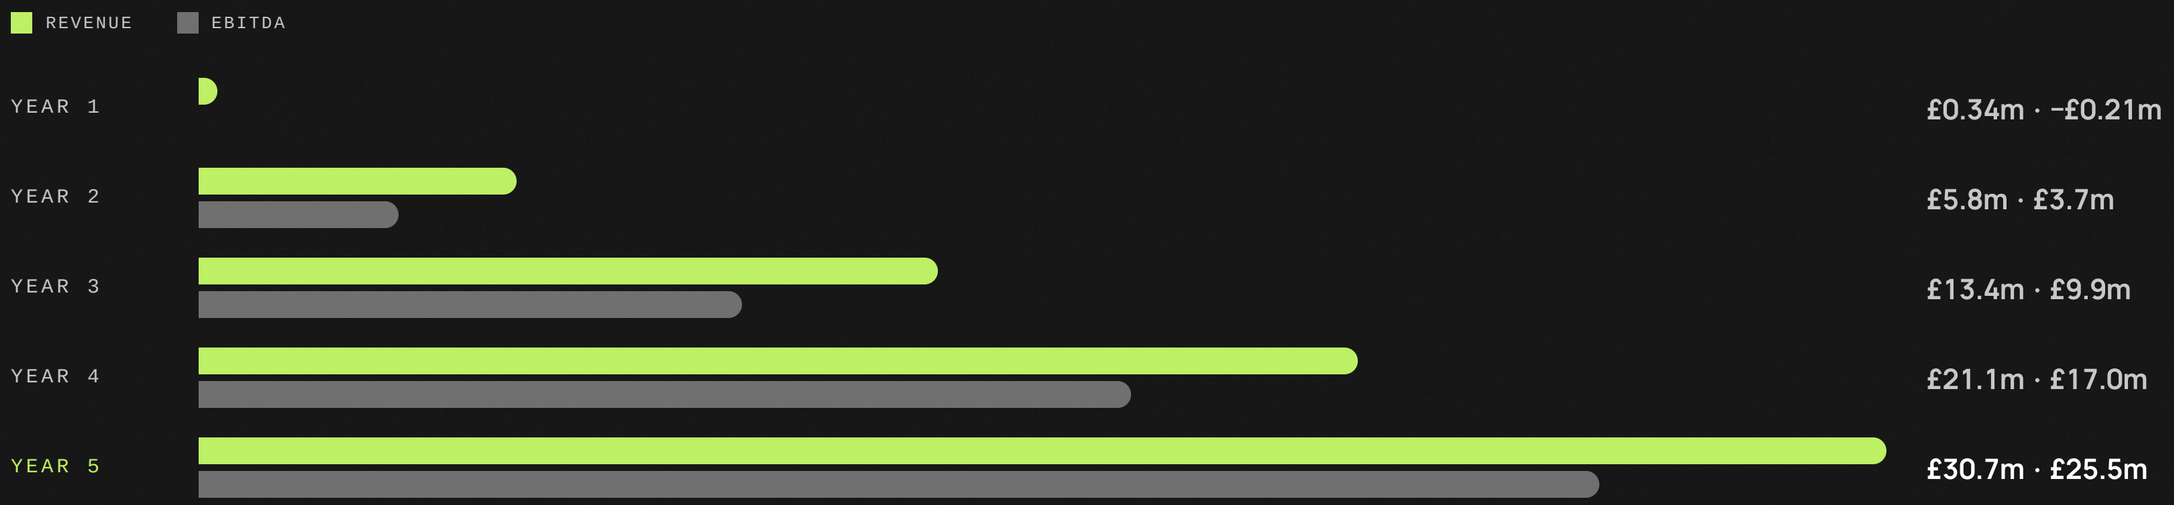
BASE CASE

£30.7m and 83% margins by Year 5.

20% of gross box office — 13% from the fan, 7% from the artist. The margin comes from the AI doing the routing, the advancing, the settlement and the campaign.



Cash-generative from November 2027, EBITDA-positive in December. The margin climbs because the roadmap does — 63% today, 83% once the artist's team runs it.

Ex-booking agents who already hold the relationships. The same six people. Thirteen tours each today, thirty-four by Year 5 — that is the roadmap, not more hiring.
