WHAT THE FAN PAYS ON TOP

WHAT THE ARTIST KEEPS, ON A SOLD-OUT SHOW

Smaller fee, bigger gross. **The artist wins on both sides.**

Our only cut of the artist's revenue is 7% of gross.

The old deal: pad the costs, then take ~20% of what survives.

The artist takes home ~45% more.

Example settlement · Hoxton Hall, 350 cap. Share of gross potential.

PEOPLE SHOWS A YEAR · THE YEAR-5 MODEL

Advancing, settlement and tax used to cost more in hours than a mid-size show could carry. **That cost collapsed.**

PHASE 03 · THE UPSIDE

No desk

It books itself. Agents move to A&R.

The take does not move. 13% from the fan, 7% from the artist, at every phase.

The raise is priced on phases one and two. Phase three is upside, not base case.

Nobody else is paid to fill the room.

Ticketing sells to the people already coming. Promoters take the risk — but filling the room falls to the artist.

	FILLS THE ROOM	ARTIST KEEPS THE DATA	ARTIST KEEPS THE UPSIDE
Ticketing Ticketmaster · AXS · DICE · See	No	No	No
Promoters Live Nation · AEG · local promoters	No	No	Partial
DAVID The product is the marketing	Yes	Yes	Yes

They get paid either way, and leave the artist to market the show. **We take 7% of gross and the booking fee** — every ticket that goes unsold is our revenue too.

The middle is most of live music.

Year 5 of our plan is £30.7m — three to five per cent of that pool. We do not need to win the market. We need the part nobody is serving.

Sector figures: UK Music. Revenue pool is our own estimate, at a 20% take on the sub-1,500-capacity segment.

BASE CASE · BUSINESS PLAN V5.1

£30.7m and 73% margins by Year 5.

We take 20% of gross box office – 13% from the fan, 7% from the artist. It is the same twenty pence on every ticket the engine sells.

EBITDA-positive in April 2027. Cash-generative from that August. Ten people at Year 5.

Agents own the relationships. AI does the work.

$$\begin{array}{ccccccc} 6 & \times & 25 & \times & 20 & = & 3,000 \\ \text{TOUR PARTNERSHIPS} & & \text{TOURS EACH A YEAR} & & \text{DATES A TOUR} & & \text{SHOWS A YEAR} \\ \text{MANAGERS} & & & & & & \end{array}$$

Ex-booking agents who already hold the relationships. Our first is in seat. That multiplication is phases one and two — phase three is what removes the ×.

Four people who have already done it.

The campaigns on slide three are theirs. So is the platform.
