

INDEPENDENT ARTISTS · 2026

Case studies.

Small budgets, run properly. What test-then-scale actually returns when the spend is an artist's own money.

THE LISTROS

ST LUNDI

(What modest spend does)

THREE CAMPAIGNS, THREE PROBLEMS

Nothing here cost more than £6,000.

12p

THE LISTROS

Cost per monthly listener taking a catalogue track from 76K to 300K.

11:1

ADMT

Return on ad spend on the live side – £6K in, £70K of tickets out.

20p

HARRY T

Cost per listener across 8M streams in 90 days on £6K of spend.

None of these are new-release budgets. They're the kind of spend an artist can fund out of their own pocket and see back inside a quarter.

TEST BEFORE YOU SCALE

We spend a little to find out where the money goes.

01

Test the track

£250 against a new release, a couple of hundred a track across a catalogue. Enough to get a real cost per result, not a guess.

02

Read the number

Cost per result is the whole decision. Below 15p a track is working. 15–25p it needs shaping. Above 25p we say so.

03

Put weight behind it

A track under 15p gets the real budget. One above 25p gets £1,000 and an honest conversation, not a campaign.

04

Move the money

Reallocated weekly on cost, intent and audience quality. Budget follows what converts.

This is why the numbers on the next few slides came off small budgets. The testing is the product — the scaling is just arithmetic once you know what a listener costs.

CRISTOPH × MICHAEL ANTHONY – SPACER

0 to 20K daily streams in 3 weeks.

A cold start on a dance record. Find the seconds that stop the scroll, then put weight behind what's already converting.

UNLOCKING CATALOGUE VALUE

76K to 300K monthly listeners.

Six months · 12p a listener

Most artists ignore their catalogue. We found a track that was already half-working, proved it responded, and scaled it. No new release, no new recording — just spend pointed at the right thing.

THE LISTROS

BREAKING A NEW RELEASE

£6,000 of spend.
8M streams.

90 days · 20p a listener

25+ content variations tested before we scaled a penny. Every one of those tests cost less than a night in a studio, and the one that worked paid for all of them.

HARRY T

FILLING VENUES PROFITABLY

5,000 tickets
on £6K of spend.

AD SPEND

GROSS TICKET REVENUE

RETURN ON AD SPEND

£6K

£70K

11:1

We didn't just drive ticket sales — we made the tour profitable. DSP ads built the awareness, retargeting converted the fans who were already listening, and attribution proved where every pound went.

EVERY WEEK

A straight read on the week.

What the spend did, what it cost, what changed, and what we're doing about it. Written in English, not exported from a platform.

Every number, daily.
Not a monthly PDF.

Sweat.fm tracks every channel in one place, updated daily.
You wake up knowing exactly what yesterday's spend did.

Let's find your song.

Ninety days, up to twelve of your tracks tested, and a straight answer
about which one can carry a career.
