

LABELS & PARTNERS • 2026

Case studies.

What the same framework returns with real budget behind it — across streaming, catalogue, merch and live.

DISCLOSURE

BLOND:ISH

(What scale does)

THREE CAMPAIGNS, THREE REVENUE LINES

Streaming, catalogue,
merch. Same method.

8M

HARRY T · STREAMING

Streams in 90 days on £6K of spend, at
20p a listener.

300K

THE LISTROS · CATALOGUE

Monthly listeners off a back-catalogue
track, at 12p a listener.

\$68K

MARK TUAN · MERCH

Merch revenue in two weeks from an
audience that came for the music.

Different problems, one method. Test cheaply, read the cost per result, then put the budget where the
number says.

BREAKING A NEW RELEASE

0 to 8M streams in 90 days.

£6K spend · 20p cost per listener

25+ content variations tested before we scaled a penny. The testing framework was the reason it worked — and the reason it was cheap.

HARRY T

UNLOCKING CATALOGUE VALUE

76K to 300K monthly listeners.

Six months · 12p a listener

No new release. No new recording. A back-catalogue track that was already half-working, proved out on a test budget and then scaled. Most catalogues have one of these in them.

THE LISTROS

CRISTOPH × MICHAEL ANTHONY — SPACER

0 to 20K daily streams in 3 weeks.

A cold start on a dance record. Find the seconds that stop the scroll, then put weight behind what's already converting.

MULTI-CHANNEL REVENUE

\$68K in merch sales in two weeks.

MERCH REVENUE

\$68K

CAMPAIGN LENGTH

2 weeks

TARGETING

High-intent

Streaming doesn't pay the bills on its own. We built a campaign that converted a streaming audience into merch buyers — integrated strategy turning listeners into revenue.

WHAT WE DO WITH A BACK CATALOGUE

Four albums nobody is working is four albums of upside.

01

Test the catalogue

A couple of hundred pounds a track across the records you already own. You find out which ones can carry a campaign.

02

Tie it to the live

Tour dates go live and the live ads run next to the catalogue work, so the streaming and the ticketing feed each other.

03

Spend by territory

Territory-led budget for the markets that convert, not a flat global buy. Geo-blocked releases get pushed where they can actually land.

04

Then the release

Pre-orders, pre-saves and the rollout — landing to an audience that has been growing for a year, not a cold one.

Where a track isn't converting we say so and move the budget. Plenty of agencies will spend your money for as long as you keep giving it to them. We won't.

WHAT DECIDES THE BUDGET

Cost per result sets the spend. Not a plan agreed in January.

< 15p

SCALE IT

A track under 15p gets £10K behind it, and another £10K if it clears a million streams in month one.

15–25p

SHAPE IT

£3K while we work the creative and the targeting. It can get there, but not yet.

> 25p

LEAVE IT

£1K and an honest conversation. Some tracks are not the one, and we will tell you which.

CURRENTLY RUNNING

Swedish House Mafia · Thundercat · Barry Can't Swim · Omar+ · St
Lundi · ADMT

ALSO ON THE BOOKS

Disclosure · Blond:Ish · Bonobo · Mark Tuan · Leon Thomas · Harry T · The Listros · Cristoph · Kid Apollo · Dolores

EVERY WEEK, EVERY ARTIST

A straight read on the week.

What the spend did, what it cost, what changed, and what we're doing about it. One of these per artist, written in English rather than exported from a platform.

One dashboard.
Every artist on it.

Sweat.fm is our own platform, not a third-party dashboard.
Meta, TikTok, YouTube, DSPs, tickets and merch tracked
against one roster, updated daily.

Bring us a roster.

We'll take the catalogue, find what has room to move, and prove it on a small budget before anyone commits a real one.
